

PROTECTION
FROM
LIGHTNING
AND
SURGES

When surges or lightning strike, don't sit on the sidelines and watch your electronics fry.

24/7

Walton EMC's Real Protection stands guard 24 hours a day to protect your expensive appliance motors and sensitive electronics against devastating lightning strikes and surges.

Affordable

Our Tripp-Lite suppressors provide convenient and economical protection for all your expensive electronics. Walton EMC has a model to fit every need, from small laptop computers to home theater.

Guaranteed

All our surge suppressors are fully guaranteed. That means if lightning or surges do get through, there's no worry. Your surge suppressor and damaged equipment will be fully repaired or replaced.* You can't lose!

Easy to Sign Up

Call or come by any Walton EMC office today and put a stop to lightning and surge damage.

Offices in Monroe, Snellville and Watkinsville.

*Limits apply. Call for details.

Lightning Safety Tips

THE NATIONAL WEATHER SERVICE RECOMMENDS...

- **Inside a home, don't use corded phones or other electrical equipment unless it's an emergency.**
- **If you're outside, get in a building or vehicle. If you can hear thunder, you're already at risk.**
- **Avoid open water as well as tractors, bicycles, motorcycles, golf carts and especially golf clubs. Cars, trucks and other enclosed vehicles are generally safe if you avoid contact with metal surfaces.**
- **In a forest, seek shelter in a low area under a thick growth of small trees.**
- **If you're in an isolated area and you feel your hair stand on end, lightning is about to strike. Drop to your knees and roll forward onto the balls of your feet. Place your hands on your knees and tuck your head down. Don't lie flat on the ground.**

Protect Your Home from Electrical Surges

WITH REAL PROTECTION FROM WALTON EMC

- Reduce insurance premiums and deductibles
- Options based on your needs
- Save aggravation and money

3 Ways to Protect Your Home

1 LARGE APPLIANCE MOTOR PROTECTOR

mounts at the meter and reduces incoming surges.

2 GROUND SYSTEM

The building's ground system must be adequately sized and in proper working order. The ground wire should be connected to a rod at least eight feet long and located away from the foundation in moist soil.

3 INDIVIDUAL PLUG-IN PROTECTORS

must be located at each individual piece of equipment for proper protection.

LARGE APPLIANCE MOTOR PROTECTOR

For just a small monthly fee, Walton EMC can protect your home's major appliance motors (like the air conditioner, refrigerator or washer) against damage from power surges or lightning strikes.

Our technician installs a Real Protection large appliance motor protector on your meter. We maintain the unit and replace it if it goes bad. If lightning gets through the suppressor, your appliance motor will be repaired or replaced.* That's cheaper than paying an insurance deductible to fix it!

*Limits apply. Call for details. Actual models may vary slightly from those pictured here.
