made **easy**

Walton EMC is removing
barriers to solar power

Walton EMC
Cooperative Solar

Here comes the sun!

WALTON EMC IS PROUD TO PRESENT OUR COOPERATIVE SOLAR PROJECTS.

Our first solar generation facility is a 1-megawatt site in northeastern Walton County. This six-acre site consists of 4,280 panels and produces approximately 2 million kilowatt-hours of solar electricity per year.

The second facility is a 2.5-megawatt site in south central Walton County. This 15-acre site consists of 10,700 panels and produces approximately 5 million kilowatt-hours of solar electricity per year.

PRICING AND ENERGY PRODUCTION

Blocks of solar electricity are \$25 each per month. Each block, equivalent to about 5.7 solar panels, is expected to produce between 180 and 260 kilowatt-hours of solar energy

monthly. Energy output will vary due to the sun's angle, the time of year, the number of cloudy days in the month and other factors.

AVAILABILITY You can sign up for up to two blocks of solar electricity. Requests for more than two blocks are handled on a case-by-case basis. Only residences served by our electric grid can participate.

SIGN UPS Sign-ups are on a first-come, first-served basis. Call us at 770-267-2505 to apply. We are not able to take online requests at this time. If blocks are sold out, a waiting list is available.

BILLING You will be billed \$25 for each block of solar electricity. The kilowatt-hours produced by your block in each calendar month will offset the same number of kilowatt-hours on your bill. If your block produces more kilowatt-hours than you use during your billing period, you will receive a credit for the excess. You will be informed of any price change at least 30 days in advance.

LENGTH OF COMMITMENT You can discontinue your solar energy commitment at any time by notifying us. If you leave the program, Walton EMC cannot guarantee there will be availability if you decide to rejoin.

You can keep up with Walton EMC's solar energy production at our Solar Dashboard. Go to our website at waltonemc.com/solardashboard

WALTON EMC COOPERATIVE SOLAR ADVANTAGES

- Walton EMC operates and maintains solar facility
- Economies of scale bring costs down
- No holes in your roof
- No solar siting issues (roof direction, shading, etc.)
- Renters can participate
- Homeowners under restrictive covenants can participate
